### 263 Squadron, Gladiators Over the Fjords

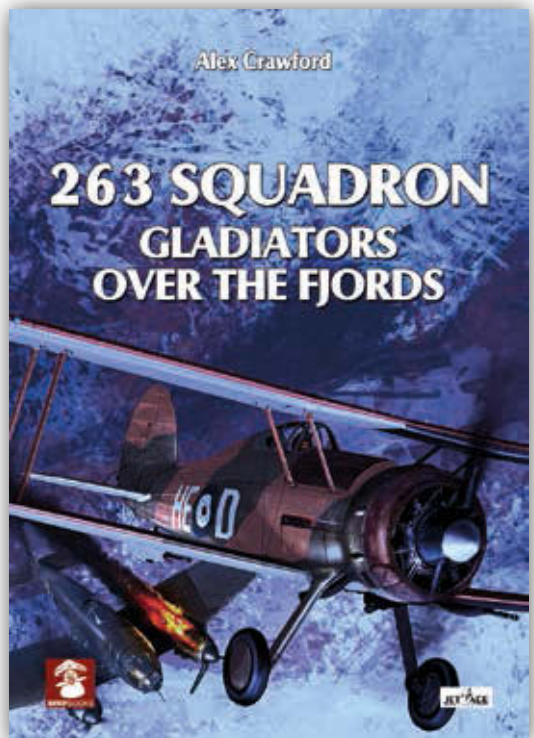

*Alex Crawford*

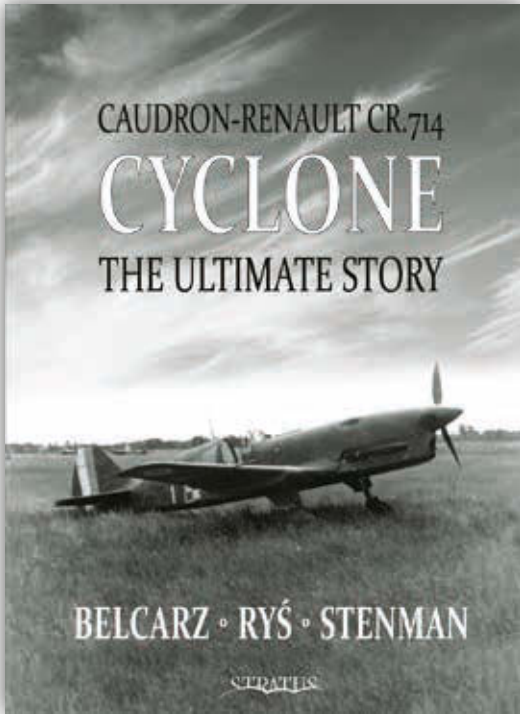

#### **OTHERS**

ISBN 978-83-63678-82-1

A4,pbk, Release Date: 2015

This work tells the story of 263 Squadron, who took its Gladiators to Norway, not once but twice. In order to provide the ground troops with air cover the Squadron was sent to operate from a frozen lake in the south of Norway. During their time in Norway the Squadron claimed at least 32 enemy aircraft shot down with many others damaged, although the cost was high. Along with the 10 pilots who lost their lives on HMS Glorious, two more were lost in action and another pilot was lost in an accident, while several more were wounded.

**Caudron-Renault CR.714 C1 Cyclone**

**The Ultimate Story**

*Bartłomiej Belcarz, Marek Ryś, Kari Stenman*

**OTHERS**

ISBN 978-83-61421-26-9

A4, HB, Release Date: 2016

This book describes, in previously untold detail, the story of the development and service of the Caudron-Renault CR.714 C1 “Cyclone” in the French and Finnish Air Forces. Whilst the concept of “lightweight” fighters was examined in many countries before and during WW2, the little Caudron was one of the very few to see production and service. On operations its limitations were cruelly exposed, but this did not stop its pilots (French, Polish and Finnish) from doing their very best, and this book is dedicated to their bravery. Comprehensively illustrated with photos, scale plans, detail drawings and color profiles, this book is essential reading for enthusiasts and historians of air combat in WW2.

**Russian Aviation Colours 1909-1922: Vol 2**

**Camouflage and Markings, Great War**

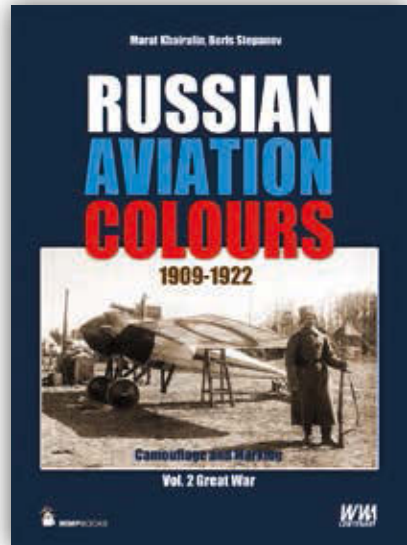

*Marat Khairulin, Boris Stepanov*

**OTHERS**

ISBN 978-83-65281-00-5

A4, HB, Release Date: 2015

This book describes the history of the little-known emblems and distinctive markings of Russian military aviation from its early origins up to the Russian exit from World War One. The authors have managed to collect, and in some cases partially reconstruct, the majority of emblems and signs used in Russia during this period by military aviation units. The collected material is presented in a clear and attractive form – colour plates, reconstructed logos, and original photographs from public and private archives. This profusely illustrated book covers all the aircraft used, with brief details of their service use and comprehensive details of the colours and markings they carried. Besides the many photographs, full colour profiles illustrate the markings applied. Detailed colour notes and precise descriptions and illustration of national markings over the period complete a book that will be invaluable to aircraft enthusiasts, historians and modellers.

## Fairey Flycatcher

Matthew Willis

### ORANGE SERIES

ISBN 978-83-63678-92-0

B5, pbk, Release Date: 2015/2016

The Fairey Flycatcher was the archtypal between-the-wars Fleet Air Arm fighter. The idiosyncratic biplane was loved by crews and public alike, despite its unlikely appearance and moderate performance, and it was famed more for its aerobatic prowess and public demonstrations than glory on the field of battle. The Flycatcher was agile yet forgiving, tough, reliable, and fully aerobatic, and, bedecked in a dazzling range of bright, colourful markings, was the perfect mount for expressing the youthful high spirits of naval pilots in the 1920s and 30s. The Flycatcher was never engaged in a war, though it played a significant role in 'colonial policing' of trouble spots in the British Empire, and served the Royal Navy doing everything from tackling pirates off the Chinese coast to entertaining crowds at Schneider Trophy events with aerobatic displays. This book is the most comprehensive on the Flycatcher yet published, with numerous photographs of the aircraft in service, several of which have never been published before, walkaround photographs of the replica built by John Fairey, illustrations from contemporary manuals, and colour artwork.

*José Fernandez, Patrick Loureau*

**WHITE SERIES**  
 ISBN 978-83-63678-59-3  
 A4, HB, Release Date: 2016

Whilst French fighter aircraft of the early war period are well known and the subject of many books, the bomber aircraft used by the French Air Force in this period are not well documented in English. This book describes and illustrates all such aircraft in use in 1940, from the obsolescent to the elegant and up-to-date modern bombers. Fully illustrated with many wartime photos, and scale plans of the major types. Full color profiles of many representative aircraft.

**Portugese Fighter Colours 1919–1956**  
*Luis Armando Tavares, Armando Jorge Soares*

**WHITE SERIES**  
 ISBN 978-83-63678-45-6  
 A4, HB, Release Date: 2015

The newest volume in MMP’s “Rainbow Series” covers the colors and markings of all the piston-engine fighters that served with the Portuguese military from the end of WW1 to the 1960s. A small nation with modest-sized air arms, Portugal nonetheless used a wide variety of iconic fighter aircraft over this period, from the SPAD S.VII of WW1 to the F-47 Thunderbolt after WW2. French, British and American aircraft were used, including such famous types as the Hawker Fury and Hurricane, the Spitfire and the Bell P-39 Airacobra. This profusely illustrated book covers all these aircraft, with brief details of their service use and comprehensive details of the colors and markings they carried. Besides the many photos, full color profiles illustrate the markings used. Detailed color notes and precise description and illustration of national markings over the period complete a book that will be invaluable to aircraft enthusiasts, historians and modelers.

French Wings No. 4,  
 LeO 45  
*José Fernandez, Patrick Laureau*  
**FRENCH WINGS**  
 ISBN 978-83-63678-78-4  
 A4, pbk, Release Date: 2015

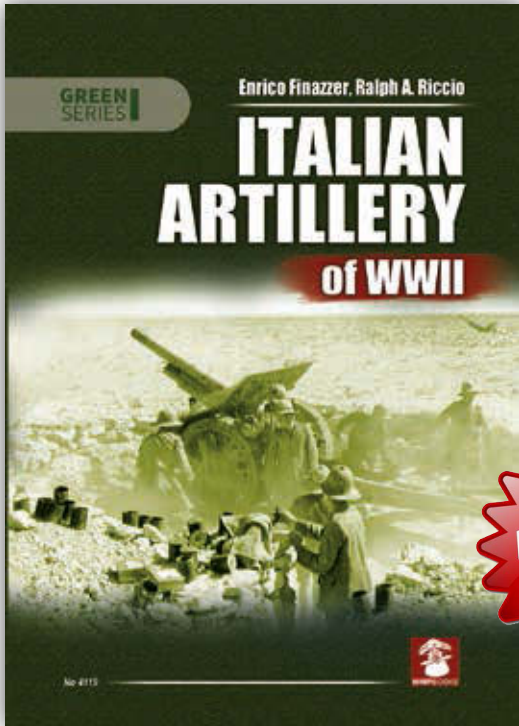

This is the fourth title in the “French Wings” series, describing the history of the LeO 45 from initial specifications to retirement after WWII. The Leo 45 was a modern (by 1940 standards) bomber in the Armée de l’Air (French Air Force), probably the best known of such aircraft. Used during the Phoney War but more importantly employed to try to stop the German onslaught during the Bataille de France. After French armistice, the Vichy Air Force built some planes, most of them captured during invasion of ‘Free Zone’ in November 1942. The Germans used this plane in the transport role, as well as French troops in North Africa when they fought alongside the Allies after Operation Torch. Specifications, construction and operations of these aircraft are described in detail, illustrated with many previously unpublished photos. Colour schemes and markings are described and illustrated (Armée de l’Air, Vichy Air Force, Luftwaffe, Armée de l’Air after Torch)

French Wings No. 5  
 Morane-Saulnier MS 406  
*Patrick Laureau*  
**FRENCH WINGS**  
 ISBN TBA  
 A4, pbk, Release Date: 2016

It is the fifth item of the “French Wings” series. This time the protagonist is the “workhorse” of French fighter force – Morane-Saulnier MS 406. It was the primary type of fighter aircraft used during the French campaign of 1940. The French operated these aircraft also in Africa, the Middle and Far East. The book covers the development, combat use, paint schemes and markings. The book is richly illustrated, also with photographs published for the first time.
